

# Frequently Asked Questions

Acceleron® insecticide and fungicide seed treatment products for soybeans  
Acceleron® fungicide seed treatment products for soybeans

Seed Treatment Products

## What are Acceleron® soybean seed treatment products?\*

Next generation seed treatments selected to enhance Genuity® Roundup Ready 2 Yield® soybeans. Acceleron fungicide seed treatment products for soybeans feature an exclusive fungicide combination of *pyraclostrobin* and *metalaxyl*. Acceleron insecticide and fungicide seed treatment products for soybeans include the same fungicide combination and utilize an industry leading insecticide.

## What are the benefits of Acceleron soybean seed treatment products?

The Acceleron fungicide seed treatment products for soybeans can provide improved plant health through more rapid and increased emergence of seedlings under certain colder conditions as well as protection from seed and seedling diseases (e.g., *Pythium*, *Phytophthora*). The Acceleron insecticide and fungicide seed treatment products for soybeans offer the same disease protection plus protection from early season insect pests including bean leaf beetles and aphids.

## Can farmers plant untreated Genuity® Roundup Ready 2 Yield® soybeans?

Yes. Farmers can choose to plant Genuity® Roundup Ready 2 Yield® soybeans without seed treatment. Choosing to plant soybeans *with* Acceleron soybean seed treatment products is encouraged as these seed treatments are selected to help maximize the full benefits of Genuity® Roundup Ready 2 Yield® soybeans, offering an early season performance advantage.

## Can Acceleron soybean seed treatment products be used on Roundup Ready® soybeans?

Yes. This is a great opportunity for farmers. Acceleron soybean seed treatment products can complement Roundup Ready® soybeans as well.

## Can other seed treatments be applied to Genuity® Roundup Ready 2 Yield® soybeans?

Yes, however Acceleron soybean seed treatment products are selected to complement Genuity® Roundup Ready 2 Yield® soybeans.

Soybean varieties treated with both Acceleron soybean seed treatment product offerings have shown improved early, season performance advantage.

## Can inoculants be added to Acceleron soybean seed treatment products?

Yes. Farmers can talk with their dealer about adding inoculants to soybeans treated with Acceleron soybean seed treatment products.

## Is there a fungicide-only option available?

Yes. An Acceleron soybean seed treatment without the insecticide component will be available for the 2011 season.

\*Acceleron fungicide seed treatment products for soybeans include Acceleron DX-109 Fungicide Seed Treatment and Acceleron DX-309 Fungicide Seed Treatment. Acceleron insecticide and fungicide seed treatment products for soybeans include the same fungicide combination, plus the addition of Acceleron IX-409 Insecticide Seed Treatment.
