

Roundup Ready[®] Soybeans

Weed Management System Recommendations

Take all the right steps to maximize your soybean profitability and success. And take the worry out of your soybean production.

Use the recommended rates and guidelines for Roundup WeatherMAX[®] on your Roundup Ready[®] Soybeans. You'll get unsurpassed weed control, proven crop safety and maximum yield potential. Plus, there is a wide application window to spray Roundup[®] agricultural herbicides in-crop providing excellent flexibility.

- 1.** Start clean—use a burndown or tillage. Consider using a preemergence residual herbicide where appropriate for early season weed control.
- 2.** Apply Roundup WeatherMAX before weeds exceed 8" in height.
- 3.** If necessary, follow with Roundup WeatherMAX before new weeds exceed 6" in height.
- 4.** Tankmix other herbicides if necessary.
- 5.** Clean equipment to minimize spread of weed seed.
