

Start Clean, Stay Clean.™

Roundup Ready® Rate

Don't Wait to Spray

The Roundup Ready® Rate provides a cost-effective option for obtaining the security of a reliable residual in Roundup Ready® Corn 2. Using a pre- and post-herbicide system delivers better early-season weed control and gives you the added flexibility of a wider window for applying a postemergent herbicide.

Roundup Ready® Rate

Effective and Simple

- 1 Start clean** with a weed-free field at planting by using either **Roundup WeatherMAX®** or **Roundup Original MAX®** for burndown treatment or use tillage. Early-season weed control is critical to protecting your yield.
- 2 Residuals:** Apply the proper Roundup Ready® Rate of either a **Harness®** or **Degree®** brand residual corn herbicide.
- 3 In-crop:** Apply **Roundup WeatherMAX®** or **Roundup Original MAX®** at a minimum of 22 ounces/acre before weeds exceed 4 inches in height.
- 4 Late Flush:** If an additional in-crop treatment of **Roundup®** agricultural herbicide is needed to control a late flush of annual weeds:
 - Apply a minimum of 22 ounces/acre of **Roundup WeatherMAX®** before weeds exceed 4 inches in height and receive 22 ounces of **Roundup WeatherMAX®** at no cost OR
 - Apply a minimum of 22 ounces/acre of **Roundup Original MAX®** before weeds exceed 4 inches in height and receive 11 ounces of **Roundup Original MAX®** at no cost.
